

WATER FOAM SPRINKLER SPRAY HEAD

MODEL: AFS-P-05

ALERTA sprinkler spray head for early extinguishing fire by discharging both water and foam, which discharges fire-fighting foam concentrate with the spray head. In case of discharging aqueous solution, it can extinguish fire by smothering with low expansion foam generated by inhaling the air inside the head.

ALERTA foam sprinkler spray head mounted within the roof structure provides an even distribution of foam assuring fast flame knock down and fire control. They also provide cooling to the structure and protection from heat radiation.

ALERTA foam sprinkler spray head can be installed on airplane hangar, tanker terminal, chemical process area, petroleum loading racks, refineries and flammable liquid storage areas.

FEATURES

Working pressure: 0,3-0,7 Mpa

Rated working pressure: 0,35 Mpa

Connection: BSP Thread

Body Material: Brass

Installation type: Pendent

Expansion: Low expansion

K Factor: 40+/-5
